SUMMARY

I am Saravana Guhan, Cybersecurity specialist currently pursuing an M.Sc in Cyber Security with proven expertise in vulnerability assessments and penetration testing. Gained practical experience during an internship at RSM India, where critical security measures were enhanced for major banking clients. Actively engaged in advanced research on Generative AI security, authoring scholarly papers and developing innovative security tools such as the MCP Scanner to evaluate protocol vulnerabilities with AI-driven scoring.

EXPERIENCE

Cyber Security Intern

RSM INDIA

06/2024 - 12/2024 Bengaluru

A firm specializing in financial audit and advisory services

- Conducted VAPT on major banking websites, mitigating critical vulnerabilities
- Audited three major banks for compliance and resilience based on IRDAI Guidelines
- Performed API testing to secure endpoints using Burp Suite and Pentesting Tools

Research Intern

AMRITA VISHWA VIDYAPEETHAM

05/2025 - Present Amrita University

An institute focusing on research and higher education

- Currently working on GenAI Security
Authoring two papers: a survey on Model Context Protocol (MCP) security and developing an MCP Scanner product
- The MCP Scanner measures the security of web listed MCP servers and assigns an AI Vulnerability Security Score (AIVSS)

EDUCATION

M.Sc Cyber Security

PSG College of Technology

08/2021 - 06/2026 Coimbatore

VOLUNTEERING

Publicity and Media Head

Cybersecurity Club @ PSG Tech

2023 - Present

Cinematography Head

Radio Hub Club @ PSG Tech

2023 - 2024

CERTIFICATION

Google Cybersecurity Specialization

Coursera

https://www.coursera.org/account/accomplishments/specialization/XKDJGSRVUDYP

KEY ACHIEVEMENTS

MCP Security Scanner and Authoring Research Paper

Developed a comprehensive security scanner for Model Context Protocol servers and currently working on publishing papers on GenAI Security

SKILLS

Burp Suite	VAPT	Git	Nmap
n8n	Langchain	IAM	Python
C++	OSINT	Web Pentesting	

PROJECTS

MCP - Guard

05/2025 - Present

https://github.com/SaravanaGuhan/mcp-guard

MCP - Guard is a security tool for ensuring the integrity of MCP servers

- A comprehensive security scanner designed for Model Context Protocol (MCP) servers
- Performs static analysis, dynamic testing, and intelligent fuzzing to identify vulnerabilities
- Provides CVSS v4.0 and AIVSS scoring for security assessment

BackCalc

11/2023 - 12/2023

BackCalc is a security project showcasing malware behaviour.

- Developed a backdoor Trojan disguised as a calculator APK
- Demonstrated cyber attack techniques including TCP reverse shell and keylogging

Hacker Themed CTF Box

07/2024 - 10/2024

Hacker Themed CTF Box is an interactive platform for learning cybersecurity skills

- Built an Android CTF app with challenges for users to reverse engineer and decrypt
- Promoted cybersecurity awareness and skill development among users
