

SYED ZAHEER AHMED N

PROFESSIONAL SUMMARY

- Experienced software developer with 7+ years of experience prepared for this role. Skilled in programming languages, software design, and debugging. Strong focus on team collaboration and achieving results. Reliable, adaptable, and solution-focused.
- Organized and dependable candidate successful at managing multiple priorities with a positive attitude. Willingness to take on added responsibilities to meet team goals.

WORK HISTORY

Sr. Developer, 02/2023 to Current

Wipro Technologies - Bengaluru, India

Manpowergroup(Feb 2023- Current)

- Development & Frameworks: Java 8,11 and 17, Spring Boot, Spring Batch (for job scheduling), Microservices Architecture, RESTful APIs & API Integration, Hibernate, JPA repository, Spring security, Maven, MySQL.
- Servers & Deployment: Linux Servers, Tomcat, Apache
- Tools Used: STS, Eclipse, MySQL Workbench, JIRA, Servicenow, Azure ADO, Jenkins, Winscp, putty for deployment, Dbeaver
- Served as the application owner for six applications, responsible for maintaining existing functionalities and implementing new features based on stakeholder requirements.
- Gained hands-on experience working with Spring Boot, microservices, Jenkins, Linux servers, Tomcat, Maven, and API integration.
- For the Medals application, resolved multiple long-standing bugs and optimized database transactions to enhance process efficiency and reduce execution time.
- Automated an entire CRON job using Spring Batch and seamlessly integrated it with Control-M.
- Established clear communication channels between stakeholders, facilitating better decision-making throughout project lifecycles.
- Conducted KAP sessions with TCS during the initial months to gain a comprehensive understanding of the applications' workflows.
- Based on these sessions, we prepared playback documents to facilitate a reverse knowledge transfer (KT) to TCS, ensuring they effectively grasped our expertise.
- These sessions enabled us to understand the upstream and downstream dependencies of all applications, their code structures, and the deployment process. A total of 41 applications were transitioned from TCS to Wipro.
- As this was a combined support and development project, we had the opportunity to maintain existing application functionalities while also implementing enhancements and new features based on our insights.
- Led a team of three junior members, assisting them with ticket

SKILLS

- Java EE Application Development
- Spring Boot
- Hibernate
- Jenkins
- SQL
- Angular
- API Development
- Software development lifecycle
- Agile methodologies
- Front-end development
- JIRA
- Code debugging
- Git proficiency
- Linux
- API integration
- MySQL

resolution, providing coding support, and reviewing their code upon completion.

- Participated in all leadership calls, where I was responsible for preparing the Weekly Status Report (WSR), Monthly Status Report (MSR), and the KPI sheet, which tracked all enhancement tickets. Played the role of a Technical Lead in this project, opening up new growth opportunities.
- Actively engaged in stakeholder calls, gaining deeper insights into requirements and business needs.
- Independently hosted and managed three to four recurring calls with stakeholders, where we discussed enhancement progress and planned new feature implementations.
- Successfully migrated the Medals application from an on-premises server to an Azure server. This complex process involved multiple software upgrades, versioning updates, and necessary functionality adjustments.
- As part of the migration process, collaborated with various teams across the organization, which provided valuable insights into different aspects of application management and deployment.
- Produced robust, accurate code that minimized production issues.
- Optimized performance through testing and tuning of applications.
- Evaluated and improved development work of other developers on team, working to provide training, constructive criticism and knowledge transfer.
- Consulted with engineering team members to determine system loads and develop improvement plans.

Senior Software Engineer, 06/2022 to 11/2022

Tech Mahindra - Chennai, India (Remote)

Product Specialist, 02/2021 to 06/2022

Cognizant

- SurePower Innovation Pet Insurance: Designed and developed service through a platform called Guidewire
- This service is used for creating and maintaining insurance requirements for pets
- Technology Used: Java 8
- Framework: Spring Boot, Hibernate, Microservices
- Tools Used: Guidewire, Eclipse, MySQL Workbench, JIRA, Jenkins for deployment
- Trained and provided coaching to 3 junior team members.

Software Engineer, 07/2020 to 12/2020

Nesh LIVE

- Rise Yoga: Designed and developed to ease the process of communication between yoga teachers and students for booking classes and attending them
- Fleetjack: Designed and developed to process and provide data using the metadata acquired from the hardware fitted on a vehicle
- Technology Used: Angular 8
- Tools Used: VSCode
- Technology Used: Java 8

- Framework: Spring Boot, Hibernate, Microservices
- Tools Used: Guidewire, Eclipse IDE, MySQL Workbench, JIRA, Jenkins for deployment

Software Engineer, 08/2017 to 04/2020

Newgen Software

- Chequebook and Internet Banking Module: Designed and developed an application that can ease the process of applying for a cheque book and internet banking feature
 - Implementing all aspects of development including database, presentation, middle-tier, domain model, and web interfaces
 - Involving in testing and implementation
 - User Restriction and Dashboard: There was a custom page built on Newgen's product(IBPS) and the requirement was to provide user based restriction on the menu items and provide a chart based representation of the pending and completed work items of the same user
 - Travel Card Management: A project that is used for the issuance, load, reload of a travel card
 - We have integrated this application with many core applications of ICICI for better experience
 - This module was also integrated with the custom page
 - LC Import: This module is to simplify the process of Letter of Credit based imports and exports
 - We have integrated this application with many core applications of ICICI for better experience
 - This module was also integrated with the custom page
 - Technology Used: Java 7
 - Framework: Struts
 - Tools Used: OmniDocs (DMS), iBps (Intelligent Business Process Suite), Eclipse, Oracle
 - Technology Used: Java 7, Angular2/5
 - Framework: Struts, Typescript
 - Tools Used: OmniDocs (DMS), iBps (Intelligent Business Process Suite), Eclipse, Oracle, VSCode
